**17h00: Conclusion**

*Translation will be provided*

\*\*\*

Doctors of the World is a medical humanitarian organization. We are working in 64 countries. A big part of our medical intervention is inside Europe, touching the most precarious population. In light of World Health Day on the 7<sup>th</sup> of April, Doctors of the World will present its findings concerning the people we meet in our daily medical programmes in 11 countries in Europe, and recommend improvements for greater access to health care.

Members of the European Parliament (from Belgium, France, Hungary, United Kingdom...), chairpersons of Doctors of the World organisations in Europe (from Belgium, France, Greece, and Spain) and other stakeholders (concerned persons, European platforms...) will take part in this debate.

\*\*\*

Please confirm before the 2<sup>nd</sup> of April if you will be there, by email:
